Drum volume : 240 ltr.  
Mixing volume : 140 ltr.  
Total length : 1018 mm  
Overall Width : 919 mm  
Filling Height : 1287 mm.  
Drainage Height: 650 mm  
Drum diameter : 850 mm  
Drum height : 400 mm  
Weight : 159 kg  
Motor: 230 V - 1,5 kW 50Hz  
Turning speed: 40 rpm

### High quality planetary mixers.

- Ideal for the on-site blending of continuous rubber paving (EPDM, SBR) and polyurethane resins. Ideal for children's parks floors.
- The drum is made of polyethylene to prevent the adhesion of the products to be mixed and to favor the cleaning.
- All the mixing mechanism can have non-stick plastic coating to facilitate the cleaning process (optional).
- Discharge of material by means of a large drain hatch in the bottom of the manually operated tank.
- Parallel straight gear motor-reducer with direct drive helical toothing (non-endless shaft, non-belts) built with high quality steels, maintenance-free oil bath.
- Manual load-lifting grille with safety switch. Very fast and completely homogeneous quality mixture. High performance.
- Extensible handles for transport. 4 wheels for easy transport in a van. Easy handling.
- All parts of the agitator mechanism are easily removable and adjustable.
- Made in Spain. They comply with all safety regulations in force and have the corresponding Declaration of Conformity and CE marking.
